

Daily Scrum, Sprint Planning, and Reviews and Retrospective

DAY	LOG	DATE	STATUS
1.Planning	<p>During this phase, I was planning about how my site would look like. That is why I was scouting the net for layout inspiration for my wireframes. The web was abundant with free templates for the layout inspiration of my wireframe. I got my wireframe inspiration from bootstrap and from news websites such as Vice News and Wallstreet Journal.</p> <p>I also spent ample time deciding what framework I'm going to use for my backend. Among the array of options, I decided to choose among Flask and Django since both of them use python. I just need to study and understand both frameworks so that I can decide which is the right option for my project.</p>	May 04, 2021	Done
2	Scouting the net and watching some video tutorials	May 05, 2021	Done
3	N/A	May 06, 2021	Null
4	Scouting the net and watching some video tutorials	May 07, 2021	Done
5	N/A	May 08, 2021	Null

6	I studied how to use the html, css, and javascript so that I can finally create a code for my wireframe. The work to be done is building html codes for the home and footer and designing them using the CSS. After that, work on the subject HTMLs as they have identical placements.	May 09, 2021	Done
7	I started building the homepage of my news websites with the html as its skeleton. I will focus more about the structure of the webpage and focus on the designs later on.	May 10, 2021	Ongoing
8	I continue on building my html webpage and gradually incorporating my css styling and javascript.	May 11, 2021	Ongoing
9	N/A	May 12, 2021	Null
10	N/A	May 13, 2021	Null
11	I completed all my html, css, and javascript for my news webpage. I also added pictures for my news webpage.	May 14, 2021	Done
12	I also added a wireframe for my LogIn and Sign Up page so that I have a webpage that uses a database.	May 15, 2021	Done
13	I am done with the codes and I just need to refine it and make a video.	May 16, 2021	Done

Sprint Review and Retrospective

As the product owner, using Sprint was helpful for me in order to keep track of my progress and plan out my project. This sprint helped me make the skeleton or the structure of my webpage that helped me proceed to the styling of my webpage. On the next sprint I will be making improvements on my webpage like the buttons and the shade of the background images to make it more classy and cleaner.
